Last Time Delivery (dd.mm.yyyy)	Running change	Last delivery date. Product reaches end of life status.

2. Successor product

	Product Name	Part Number
	conga-TC175/3965U MAN1	12052957
Availability (dd.mm.yyyy)	n/a	

3. General Information

This PCN notification announces the change of the product herein. The process of determining the product change has been implemented in accordance to the DATA MODUL PCN procedure

The information about the change of a product is usually issued prior to the specification change in order to provide customers using this product the opportunity to take the necessary steps with regards to technical changes, certifications etc. and their purchasing plans. In some cases there is no transition time available due to the immediate change or end of life policy of our suppliers. Users of this changed product should review the PCN notification carefully to ensure that final purchases are made within the schedule as defined in the section 1 of this document. There is also the rare possibility that the supplier may no longer be able to produce and deliver the full requested quantity, due to unexpected events. As a consequence Data Modul will not be able to support the requested Last Time Buy quantities.

Last Time Buy

This is the final date at which orders will be accepted for deliveries of the PCN product. After this date DATA MODUL AG stops all activities in purchasing component material for further production of the PCN product or purchasing the PCN product itself from other suppliers. Please note that this last time buy date might be some time prior to the official last time buy date of our suppliers, as we have to calculate further internal procedures in between.

Last Time Delivery

After this specific date no more products will be produced and last deliveries will be shipped. Last time buy quantities will be shipped to the customer normally in one final shipment. Partial shipments of last time buy products will only be possible by separate individual contracts.

Successor Product

Usually DATA MODUL AG will have a recommendation for a successor product that should retain the functionality of the original PCN product. This should enable the customer to easily replace the PCN product without too much complication.

DATA MODUL AG does not guarantee that the recommended replacement product will have exact the same layout, function and/or features of the PCN product. Furthermore DATA MODUL AG does not ensure that the software or hardware previously used with the PCN product will be compatible with the newly recommended product.

Note

If you have any questions about the PCN procedure and/or the recommended successor product, contact your local DATA MODUL AG sales representative.

Best regards,
Product Management
